Core Engineering & Accounting Architecture

Why Business Systems Need an Accountant Who Can Code

CORE PILLARS

1. Zero Phantom Inventory & Stock Gating

Transactional integrity enforced before order persistence. Validates real-time available stock (`onHand - reserved`), preventing overselling during concurrent wholesale billing cycles.

2. Hard Discount Ceilings & Margin Protection

Representative discounts capped strictly at 5%. Any price override above threshold automatically triggers an approval gate, eliminating unauthorized margin leakage.

3. Multi-Branch Isolation via Row-Level Security

PostgreSQL RLS policies isolate Cairo, Alexandria, and Mansoura territories at database engine level. Reps can never view or modify invoices outside their assigned branch.

4. Double-Entry Inventory Reconciliation

Every warehouse fulfillment writes atomic double-entry movement logs. Batch numbers, FEFO expiration dates, and physical vs ledger counts reconcile with zero variance.

5. Automated C-Suite ETL & Sub-Second BI Slicers

Replacing manual clerks with automated Power Query M pipelines and dynamic arrays. Reconciled grand totals, DSO aging curves, and Pareto 80/20 product margin rankings.

Technical Stack & Enterprise Tooling

React 18 · TypeScript · Node.js · PostgreSQL · Supabase RLS · Electron Desktop · Microsoft Excel 365 · Power Query (M) · Google Apps Script

5 Pre-Configured Test Roles:

- CEO (مصطفى رضوان)
- Sales Manager (أحمد حسن)
- Senior Accountant (منى الجمل)
- Warehouse Keeper & Sales Reps

COMMERCIAL DISTRIBUTION PLATFORM

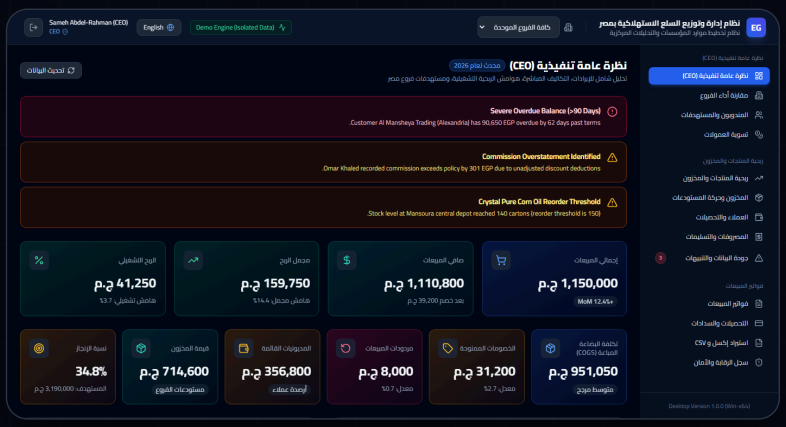

Al Amal FMCG Desktop ERP

A native Windows desktop ERP built for Obour City food distributors. Integrates real-time wholesale sales invoicing, warehouse inventory deduction, van replenishment, and financial collections into a unified Cairo Arabic interface.

- ✓ **FEFO Expiration Tracking:** Real-time waste prevention flagging batches nearing expiration within 60 days.
- ✓ **Route Scoping:** Sales representatives only access assigned wholesale accounts (North Cairo, Giza, East Cairo).
- ✓ **17 Operational Modules:** Invoicing, credit limits, treasury, collections, warehouse, and Excel data import.

React 18 · TypeScript · Electron · Supabase RLS · Tailwind CSS

ENTERPRISE ARCHITECTURE

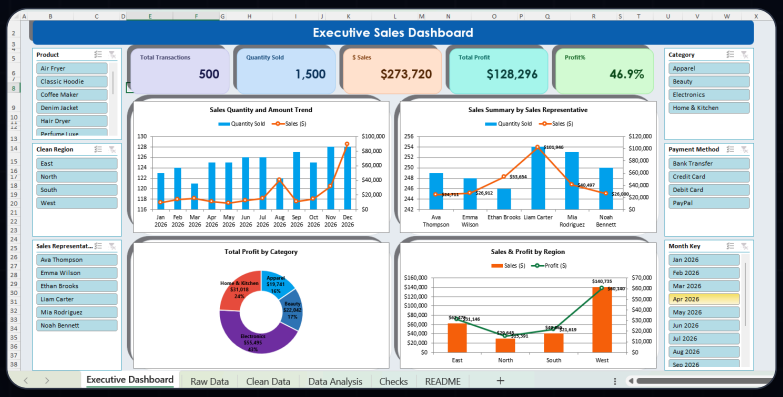

Multi-Branch Distribution ERP

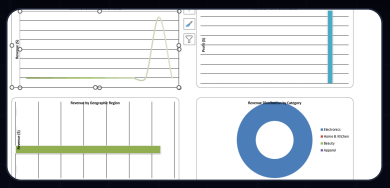

A centralized enterprise platform connecting three regional distribution hubs in Egypt with strict territory isolation, automated commission settlements, and 13 operational modules.

- ✓ **13 Modules Tested 100% Operational:** CEO Overview, Branch Comparison, Sales Reps, Commissions, Product Profitability, Inventory, Receivables, Expenses, Data Quality Alerts, Invoices, Payments, CSV Import, and Audit Log.
- ✓ **Policy-Driven Commission Engine:** Evaluates net sales vs returns, flagging historical discrepancy variances in real-time.
- ✓ **Zero Float Rounding:** Uses PostgreSQL NUMERIC(14,2) to eliminate rounding drift across currency transfers.

React 18 · Node.js Express · PostgreSQL · Prisma ORM · Docker

Live Interactive Demo: `demos/egypt-multi-branch-erp/index.html`

Model Key Metrics:
- Revenue: $273,720 | Profit: $128,296
- Profit Margin: 46.9%
- 500 B2B Wholesale Order Lines

COMMERCIAL FINANCIAL CONSULTING

Executive Excel BI Model

A C-suite financial intelligence model designed to eliminate manual spreadsheet assembly. Ingests transactional sales records via Power Query ETL, calculating real-time margin contributions and DSO receivables aging.

- ✓ **Automated Power Query ETL:** Ingests, normalizes, and validates records with zero manual copy-pasting.
- ✓ **Dynamic Array Calculations:** Built using `XLOOKUP`, `FILTER`, `LET`, and `SUMIFS` with defensive error handling.
- ✓ **100% Mathematical Cross-Footing:** Independent audit checks tab reconciling revenue and COGS totals to $0.00 variance.

Fiverr Service Offerings & Commercial Engagements

Order Direct on Fiverr • Safe Escrow • Guaranteed Satisfaction

FIVERR FREELANCE

TOP-RATED SERVICE

Executive Excel Dashboards & Power Query Models

Custom C-Suite financial dashboards, automated multi-table Power Query ETL, and dynamic KPI scorecards tailored to your business data.

- ✓ Automated ETL data normalization
- ✓ Interactive slicers & margin ranking
- ✓ 100% mathematical check totals
- ✓ Zero formula errors & full training

Order Gig on Fiverr ↗

CLOUD AUTOMATION

Google Sheets & Apps Script Cloud Systems

Custom serverless web applications, relational Google Sheets databases, automated PDF invoice generation, and email workflow integrations.

- ✓ Relational multi-sheet databases
- ✓ Custom Web Apps (HTML/CSS UI)
- ✓ Automated invoicing & triggers
- ✓ Real-time multi-user permissions

Order Gig on Fiverr ↗

ENTERPRISE DEVELOPMENT

Custom Multi-Branch ERP & Full-Stack Systems

End-to-end bespoke software systems for distributors, manufacturers, and retailers requiring multi-branch isolation and strict accounting controls.

- ✓ React 18 & Node.js architecture
- ✓ PostgreSQL Row-Level Security
- ✓ Electron native desktop apps
- ✓ Custom API integrations & Docker
